

Resident Engagement, Redefined

Welbi is a Recreation Management Platform designed to reduce administrative work so Life Enrichment teams can spend more time making memorable experiences.

How Welbi Supports Your Community

1

Personalize Life Enrichment Programming For Each Resident

Welbi's platform centralizes resident information. It gives each community a complete view of the unique interests, hobbies, and needs of each resident so they can deliver personalized, meaningful, and engaging activities.

2

Ensure No Resident is Socially Isolated

Welbi's intuitive documentation and attendance tracking help each community stay on top of each resident's participation. Staff are proactively alerted if a resident needs engagement so no one is isolated.

3

Tools for Continuous Improvement

Welbi's platform allows the team to measure the success of programs, ensure all programming is balanced across all the dimensions of wellness, and that their overall recreation goals are being consistently met.
